Notes:
 2. Three-year combined number, and 3-year average annual measure.
 9. Denotes indicator where categorization as better or worse than comparator average is not appropriate and data are subject to local interpretation.
 11. The ESP2013 has been used to calculate the rate for this indicator. Please see Appendix I of the technical report for further details.

Spine Chart Key:
 % =percent
 cr85=crude rate per 1,000 population aged 85 and over
 sr10=age-sex standardised rate per 100,000 population (85+ years) to ESP2013. Please see Appendix I of the technical report for further details.
 sr9 =age standardised rate per 100,000 population (85+ years) to ESP2013. Please see Appendix I of the technical report for further details.

Spine Chart Key:
 ● Statistically significantly 'worse' than National average
 ○ Statistically not significantly different from National average
 ● Statistically significantly 'better' than National average
 ● Statistically significant difference compared to National average
 △ No significance can be calculated

See the detailed Definitions and Sources table for indicator information and Technical Report for further guidance on interpreting the spine.
